Niederdruck Kreiselpumpe Typ NB

**Low-pressure centrifugal pumps
Pompes à basse pression
Pompe centrifughe a bassa pressione**

> Niederdruck-Kreiselpumpen in Blockbauweise

Vorteile

- Optimale Wirkungsgrade
- Geringer Leistungsbedarf
- Motoren geräuscharm
- Geringer Raum- und Platzbedarf im Vergleich zu Normpumpen
- Abriebfeste Werkstoffe
- Individuelle Anpassung an die Anlagenkennlinie
- Individuelle Bauformen durch Baukastenprinzip
- Servicefreundliche Konstruktion
- Hohe Betriebssicherheit und Zuverlässigkeit
- Spezielle Ausführungen mit Trockenlaufschutz, Sperr- oder Spülkammer und für heiße Medien

Anwendungsgebiete

Die Pumpen sind ausgelegt für

- Saubere und leicht verunreinigte, abrasive Medien
- Chemisch neutrale und aggressive Medien wie Laugen, Lösemittel, Kühlmittel, Schmiermittel, usw.
- Einsatz von Schwimmbadattraktionen
- Badewasserumwälzung
- Wasseraufbereitungsanlagen
- Oberflächentechnik: Waschen, Reinigen, Entfetten, Phosphatieren, Beizen
- Werkzeugmaschinenbau
- Umwelttechnik
- Flüssigkeitsaufbereitung, Recycling und Entsorgung

Konstruktion

- Einstufige Niederdruck-Kreiselpumpen in Blockbauweise
- Wellenabdichtung als Gleitringdichtung wartungsfrei ausgeführt
- Gleitringdichtung aus hochabriebfestem und chemikalienbeständigem Werkstoff
- Geschlossene Laufräder
- Pumpenwelle freiliegend – nur im Motor verstärkt gelagert
- Rohranschlüsse nach DIN EN 1092-2

Standard-Motoren

- Drehstrom-Kurzschlußläufer - oberflächengekühlt - nach DIN IEC 38 und DIN ISO 38
- Schutzart IP 55
- Bauform B3/B5
- Isolationsklasse F
- Kühllufttemperatur 40 °C
- Drehzahl: 2900 min⁻¹ oder 1450 min⁻¹
- Wicklung: bis 3 kW: 230V±10%
400V±10%
ab 4 kW: 400V±10%
690V±10%

Die Motoren sind ausgelegt für Dauerbetrieb, die Kugellager verstärkt geschmiert

Leistungsbereich

- Betriebstemperatur max. 120 °C
- Förderströme bis 600m³/h
- Förderhöhe bis 100 m

> Low pressure close-coupled centrifugal pumps

Advantages

- Optimum performance
- Low power requirement
- Quiet operation
- Small space requirements compared to standard pumps
- Materials resistant to abrasion
- Individually adapted to the performance curves
- Individual designs through mechanical assembly technique
- Easy accessibility for maintenance and service
- High safety and reliability
- Special versions with dry run protection, sealing liquid chamber and for delivery of hot media

Fields of application

The pumps are designed for

- Clean and slightly polluted, abrasive liquids
- Neutral or aggressive media, such as alkalines, solvents, coolants, lubricants a.s.o
- To operate water features and recreational facilities in swimming pools
- Circulation of water in swimming pools, Filtersystems, thermal and therapeutical baths
- Surface technique washing, cleaning, degreasing, phosphating, pickling
- Machine-tool industry
- Environmental technology filtration and recycling technology

Construction

- Single-stage close coupled
- Shaft sealing by maintenance free mechanical seal
- Mechanical seal resistant against chemicals and abrasion
- Closed radial impellers
- No shaft support within the pump necessary
- Pump connection according to DIN EN 1092-2

Standard Motors

- Three-phase induction squirrel cage motor, surface-cooled according to DIN IEC 38 and DIN ISO 38
- Protection IP 55
- Construction B3/B5
- Isolation F
- Coolant temperature: 40 °C
- The motors are designed for continuous operation, with grease lubricated deep grooved ball bearings
- Drehzahl: 2900 min⁻¹ or 1450 min⁻¹
- Wicklung: up to 3 kW: 230V±10% 400V±10% from 4 kW: 400V±10% 690V±10%

Performances

- Materials for temperatures max. 120 °C
- Delivery up to 600m³/h
- Delivery head up to 100 m

> Pompes centrifuges monoblocs basse pression

Avantages

- Rendements optimaux
- Faible consommation électrique
- Silencieuses
- Faible encombrement comparé avec les pompes standard
- Matériaux résistants à l'abrasion
- Adaptables à toutes les caractéristiques hydrauliques
- Types de construction individuels grâce à une conception par bloc-éléments
- Entretien facile
- Grande sécurité d'emploi
- Grande fiabilité
- Version spéciales avec protection contre la marche à sec, avec carter de rinçage carter de blocage ou pour des liquides chaudes

Domaines d'utilisation

- Les pompes sont insensibles aux
- liquides propres, légèrement sales et abrasive
 - liquides neutres ou agressives, p. ex. lessives alcalines, solvants, agents réfrigérants lubrifiants, etc.
 - Pompage et la filtration d'eaux de piscines ou thermales, d'installations médicalisées ou ludiques
 - Technique de surface nettoyage, lavage, dégraissage, phosphatation, décapage
 - Machines-outils
 - Technique de l'environnement filtration et recyclage

Construction

- Pompe centrifuges monobloc
- Etanchéité de l'arbre par garniture mécanique ne demandant aucun entretien
- Garniture mécanique résistante aux substances chimiques et à l'abrasion
- Rotor radial d'exécution fermée
- Arbre de la pompe à palier dans le moteur uniquement
- Raccords de tuyaux avec filetage brides DIN EN 1092-2

Moteurs standards

- Moteurs triphasés à cage et ventilés suivant normes DIN IEC 38 et DIN ISO 38
- Indice de protection IP 55
- Type B3/B5
- Isolation: F
- Température d'ambiance: 40°C
- Les moteurs sont conçus pour une utilisation continue, les roulements sont renforcés et lubrifiés par une graisse à haute performance
- Vitesse de rotation: 2900 min⁻¹ ou 1450 min⁻¹
- Bobinage: jusqu'à 3 kW: 230V±10% 400V±10% au delà de 4 kW: 400V±10% 690V±10%

Performance

- Matériaux pour températures max. 120°C
- Débit jusqu'à environ 600m³/h
- Hauteur monométrique jusqu'à environ 100 m

> Pompe centrifughe monoblocco

Vantaggi

- Minor spazio occupato rispetto alle normali pompe
- Tipo di costruzione con materiali resistenti all'usura
- Adattabili a tutte le caratteristiche idrauliche
- Esecuzioni specifiche grazie al principio di costruzione modulare
- Costruzione di facile manutenzione e riparazione
- Elevata affidabilità e sicurezza di funzionamento
- Esecuzioni speciali con protezione contro la marcia a secco, con carter antigocciolamento e per il pompaggio di liquidi caldi

Settori d'applicazione

Le pompe sono concepite per

- Liquidi puliti, sprochi, corrosivi o aggressivi
- Liquidi chimicamente neutri come soluzioni alcaline, solventi, refrigeranti, lubrificanti ecc.
- Attrazioni per la piscina
- Circolazione acqua del bagno
- Impianti di purazione dell'acqua
- Tecnica della superficie: lavaggio, pulizia, sgrassatura, fosfatazione, decapaggio
- Costruzione di macchine utensili
- Tecnologia ecologica: trattamento, riciclaggio e smaltimento dei liquidi

Costruzione

- Pompe centrifughe monoblocco
- Guarnizione dell'albero tramite tenuta ad anello scorrevole che non richiede manutenzione
- Guarnizione altamente resistente all'abrasione e agli agenti chimici
- Giranti di tipo chiuso
- Albero pompa con supporto nel motore e alloggiamento rinforzato
- Connessioni flangiate secondo DIN EN 1092-2

Motori standard

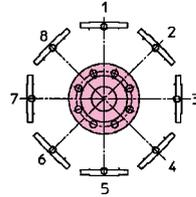

- Motore trifase in corto circuito, a ventilazione esterna, secondo DIN IEC 38 e DIN ISO 38
- Protezione: IP 55
- Forma: B3/B5
- Classe d'isolamento: F
- Temperatura ambiente: 40 °C
- I motori sono concepiti per il funzionamento continuo, i cuscinetti a sfera rinforzati e lubrificati a vita
- Numero di giri: 2900 min⁻¹
1450 min⁻¹
- Avvolgimento: sino a 3 kW: 230V±10%
400V±10%
a partire da 4 kW: 400V±10%
690V±10%

Ambito prestazioni

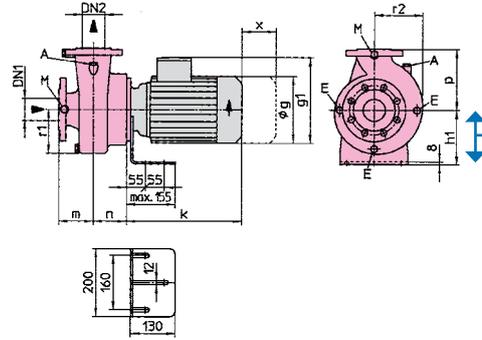

- Temperatura d'esercizio max. 120 °C
- Portate sino a 600m³/h
- Prevalenze sino a 100 m

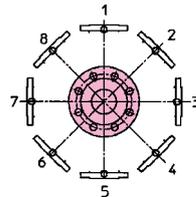

Mit Stützfuß / with support foot / avec béquille / con piede angolare

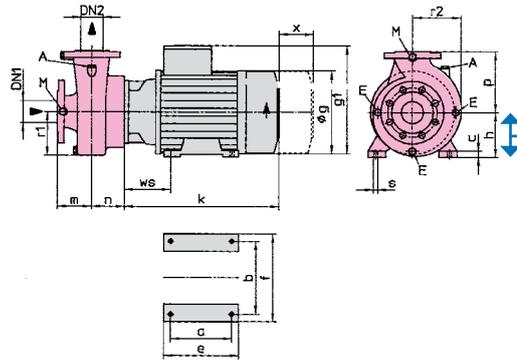

Stutzenstellungen
Connection positions
Positions des tayaux
Posizioni dei manicotti

Mit Motorfuß / with motor foot / avec pied de moteur / con piede di fusione

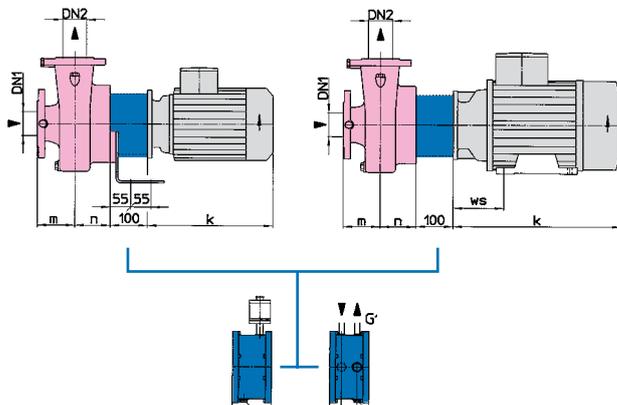

Stutzenstellungen
Connection positions
Positions des tayaux
Posizioni dei manicotti

A: Auffüllbohrung/ filling tube/ coude de remplissage/ Foro per riempimento
E: Entleerbohrung/ drain tube/ coude de vidage/ Foro per svuotamento
M: Manometeranschluß/ pressure-gauge tube/ raccordement du manomètre/ attacco manometro

Trockenlauf- und/oder Verschleißschutz

Dry-run protection and against wear for the mechanical seal
Protection contre la marche à sec et anti-usure efficace
Protezione contro la marcia a secco e di protezione anti-usura

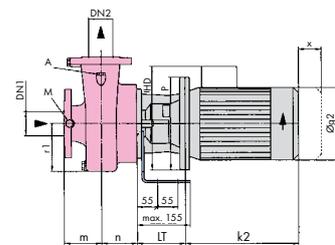

System ohne Sperrdruck (Option)
System without blocking pressure
Système sans pression de barrage
Sistema con lubrificazione autonoma

System mit Sperrdruck (Option)
System with blocking pressure
Système avec pression de barrage
Sistema ad anello di liquido in contropressione

Mit Normmotor

With IEC motors
Avec du moteur normalisé
Con motore standard a norma

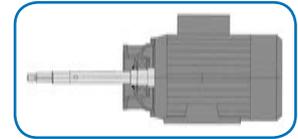

Ausführung nur mit Stützfuß
Only with support foot
Seulement avec béquille
Solo con piede angolare
