

Properties	Benefits
Compact and modular	<ul><li>Space-saving installation</li><li>Flexible and demand-driven configuration</li></ul>
Plug-and-Play	<ul><li>Fast installation</li><li>Easy retrofitting</li></ul>
High pressure up to 150 bar with optional flushing pump	<ul> <li>Short-breaking chips</li> <li>Reduced processing times due to higher cutting speeds</li> <li>Extended tool life</li> <li>High flushing performance</li> </ul>
Effective filtration via belt filter	<ul> <li>Reduced concentration of ultra-fine particles</li> <li>Long service life of components and the cooling lubricant (CL)</li> </ul>
Wear-resistant screw spindle pump	Long service life and process reliability
Demand-driven pump control	<ul><li>Lower energy costs</li><li>Lower heat development</li><li>Longer durability</li></ul>
Attractive price-performance ratio	Short amortization time

### **Application**

The KNOLL high pressure unit LubiCool®-L is a compact high pressure unit for machine tools, particulary for small and medium machining centers and lathes. The system cleans the CL and provides the machine with high pressure.

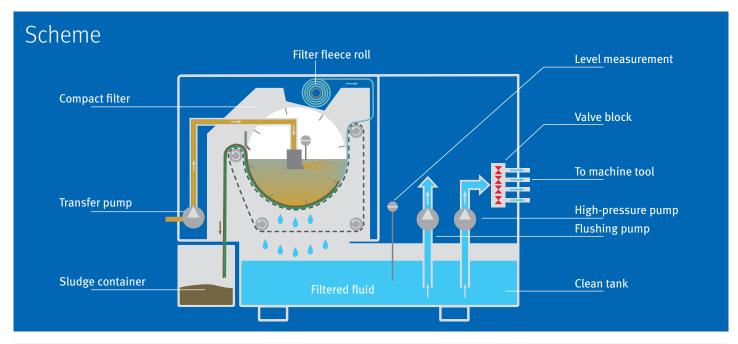

It is suitable for

- Demanding machining processes
- Machining difficult materials (e.g. high-alloy steels, titanium, copper)
- High pressure requirements with increased volume of CL
- Additional flushing requirements
- Original equipment and retrofitting

### Description

- 1. The transfer pump or the lift pump of the chip conveyor conveys the dirt CL from the machine tool into the compact filter.
- 2. The compact filter separates chips and the soiling from the CL, which flows in the clean media tank.
- 3. The dirty fleece is collected in the sludge container.
- 4. The high pressure pump provides the machine tool demand-driven with cleaned CL through switchable outputs.
- 5. The SmartConnect control enables control, monitoring and visualization of the system parameters.

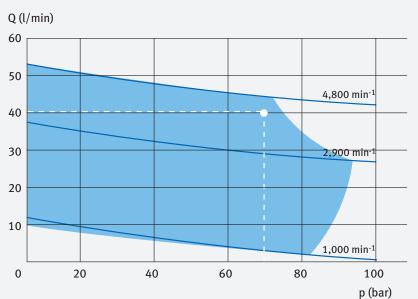

# Pump characteristic curve

With the optional frequency control, every point within the diagram in the light blue area is possible.

### Layout example

Media: Emulsion
Viscosity: 2 mm²/s
Pressure: 70 bar
Delivery rate: 40 l/min

## Equipment

KNOLL compact filter KF (with filter fleece)  KNOLL screw pump KTS  KNOLL SmartConnect control incl. touchpad and LED-status light  Interface cables (individual)  Clean tank  Sludge container  Fixed high pressure outlet  Transfer pump with frequency inverter  KNOLL centrifugal pump TG  Switchable outputs (1, 4 or 8 pieces)  Frequency inverter for all pumps  Cooling (continuous flow cooler or plate heat exchanger)  Temperature sensor  WHG-sensor  Hose set  O  Pressure reduction for spindle flushing	Paneling	•

## Dimensions and technical data

Dimensions (L x W x H)	1615 x 865 x 1582 mm
Tank capacity	360 l
Power supply	400 V
Cooling lubricant	Emulsion, oil
Filter fineness	Up to 20 μm
Volumetric flow	Up to 150 l/min
Pressure range	Up to 100 bar
Connected load transfer pump	1.5 kW
Connected load high-pressure pump	7.5 kW
